

## Trailer and Lorry Security Marking

Postcode marking with self-adhesive vinyl lettering is a quick and effective way to make your vehicle identifiable. Applied to the roof, they are a more simple and easy way of tracing the vehicle. A postcode is recognisable and can be checked quickly. Some other unique identifiers need to be linked to the company issuing them before tracing the owner can begin.

Roof-mounted lettering can be seen from above and often those on foot are not aware of their presence. They can be covered but if a thief is unaware of their presence, the chances of tracing a stolen vehicle is greater. The letters are very difficult to remove and will leave a 'ghost' impression of the letters should the thief try, again enhancing the chance of recovery and, more importantly, proving the vehicle belongs to you once found. It is also recommended that you stamp, write or engrave your postcode in as many places as possible, inside and out, concealed and obvious.

The self-adhesive letters are easy to apply and will stick to most clean smooth surfaces.

Vinyl letters are available in three colours: black, white or red, to allow the greatest contrast to your background. The letters are 12 inches high (which can be adjusted on request).

Cost, including postage and packing, is £30.00 per set.
